## CAREER OBJECTIVE

Motivated and detail-oriented B.Tech student specializing in Cloud Computing and DevOps, aiming to build a career in cloud infrastructure, automation, and modern software delivery practices. Skilled in CI/CD, containerization, and cloud platforms, with a strong commitment to learning emerging technologies and contributing to the development of scalable, secure, and reliable systems.

---

## EDUCATION

KGIST Institute of Technology  
B tech- Information Technology

**2023-2027**  
**CGPA: 8.45**

---

## PROJECT

- **Weather Forecasting System with Chatbot:** Integrated weather models with an AI chatbot to provide farmers real-time crop suggestions, improving decision-making and sustainability.
  - **MedCycle – AI-Powered Medicine Redistribution Network:** Full-stack app enabling medicine donation, AI/manual verification, dual sender/receiver roles, and admin oversight using Django, React, SQL, Docker.
  - **Serverless To-Do List Application:** Built a task management app using AWS Lambda, API Gateway, DynamoDB, and S3, with authentication and CRUD operations. Designed for scalability and cost efficiency.
- 

## SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, CloudWatch)  
DevOps Tools: Docker, Kubernetes, Jenkins, Git, Maven  
Programming & Scripting: Java, Python, Bash, HTML, CSS, JavaScript  
Version Control & CI/CD: Git, GitHub, GitLab, Jenkins Pipelines  
Operating Systems: Linux (Ubuntu), Windows

---

## CERTIFICATIONS

CLF-C02: AWS Certified Cloud Practitioner – Amazon Web Services (AWS)  
LFS167: Introduction to Jenkins – The Linux Foundation  
LFS101: Introduction to Linux – The Linux Foundation  
AWS Educate Cloud Computing 101 – Amazon Web Services (AWS)  
AWS Cloud Essentials Knowledge Badge – Amazon Web Services (AWS)
